

Dear Sruti Dondapati

Congratulations! We are pleased to offer you the position of Data Science Intern. This internship is designed to provide hands-on experience in building and applying machine learning models to predict home prices, working with large-scale MLS datasets, and focusing on model development, feature engineering, and real-world real estate valuation problems through structured mentorship and project-based learning

Position Details

Position Title: Data Science Intern

Organization: IDX Exchange

Location: Remote

Program Duration: 12 weeks

Expected Start Date: June 16, 2026

Expected End Date: September 15, 2026

Time Commitment: Approximately 5–10 hours per week

Compensation: Unpaid

Program Classification

The IDX Exchange Internship Program is intended to provide practical experience, technical skill development, and professional development. Participants are not employees of IDX Exchange and do not receive wages, stipends, or financial compensation.

Participation in this program is for professional development purposes only. Participants are not considered employees, contractors, or agents of IDX Exchange. The IDX Exchange Internship Program is structured so that the primary beneficiary of participation is the participant. IDX Exchange provides structured supervision and mentorship. Participation does not create an employment relationship now or in the future.

Purpose of the Program

The primary purpose of this program is for your professional development and not for the performance of productive work for IDX Exchange. The program is structured to emphasize learning outcomes, mentorship, and technical skill development.

Participants are expected to focus on learning objectives, technical development, and portfolio building rather than production work. Participants in this program do not displace any existing or potential IDX Exchange employees. The program exists independently of IDX Exchange's normal business operations and was created solely to provide real-world professional development opportunities for students and early-career professionals. All technical

infrastructure used in this program is purpose-built exclusively for professional development of interns and is entirely separate from IDX Exchange's business operations.

Program Structure

Participants typically spend their weekly 5–10 hours engaged in structured activities such as:

- Weekly virtual meetings with a small project team (typically 5–6 participants)
- Technical mentorship discussions and guidance
- Project-based learning activities
- Independent technical skill development
- Documentation and portfolio development

Participant progress is evaluated based on engagement with learning activities, collaboration, and skill development rather than productivity or business outcomes.

Collaboration Environment

Participants will gain exposure to professional technical collaboration environments including:

- Virtual team collaboration meetings
- Cloud-based team communication tools
- Version control collaboration
- Access to IDX Exchange's cumulative codebase for learning purposes
- Exposure to real-world workflows
- Experience working in structured technical teams

Learning Objectives

Through this program, participants are expected to develop practical skills in:

- Building and training machine learning models to predict home prices using real-world MLS
- Performing data cleaning, preprocessing, and feature engineering using Python
- Translating data findings into clear business insights
- Applying regression techniques and evaluating model performance (e.g., MdAPE, R^2)
- Understanding end-to-end machine learning workflows, from data ingestion to model output
- Developing and iterating on valuation models based on real estate features (price, sqft, location, etc.)
- Structuring datasets for machine learning applications and model training
- Using version control systems (e.g., GitHub) for collaboration and code management
- Explaining model approach, assumptions, and results in a clear and structured manner
- Building a professional portfolio showcasing machine learning projects in real estate

- Collaborating in a team-based environment on applied machine learning problems

Project Activities

These activities are intended for skill development. They may resemble real-world technical workflows but are created solely for learning purposes and are not required for IDX Exchange business operations.

All real estate datasets used in this program are sourced from third-party MLS/IDX data feeds and are made available exclusively to support participant learning and skill development.

Ownership of Work Product

As part of participation in the IDX Exchange Internship Program, participants may contribute to projects, software, data analyses, documentation, models, dashboards, research, or other materials ("Work Product") for educational and professional development purposes.

To ensure consistency and protection of collaborative projects, participants agree that any Work Product created as part of the IDX Exchange Internship Program will be considered program work product and assigned to IDX Exchange solely for the purpose of maintaining continuity of shared educational projects and technical infrastructure.

Participants retain the right to:

- Describe their work and contributions on resumes, LinkedIn, and portfolios
- Retain copies of non-confidential work for educational purposes
- Discuss technical skills and learning outcomes gained during the program
- Showcase project summaries or screenshots that do not contain confidential data or proprietary system details
- Independently recreate similar projects for personal educational use provided no confidential data or proprietary infrastructure is used.

IDX Exchange remains committed to ensuring the internship remains a learning-focused experience, and this provision is intended only to protect shared project infrastructure and collaborative technology developed within the program.

Supervision and Mentorship

Participants will receive guidance from technical mentors and program supervisors who provide:

- Technical feedback
- Project guidance
- Professional development support
- Career mentorship

Code of Conduct / Professional Expectations

Participants are expected to conduct themselves in a professional and respectful manner. As part of the program, participants agree to:

- Engage respectfully with mentors and fellow participants
- Participate in team meetings and collaborative learning activities in good faith
- Use program resources and technical infrastructure responsibly
- Maintain integrity in all submitted work
- Communicate professionally in program collaboration platforms
- Respect the learning environment established for all participants

Failure to adhere to these expectations may result in removal from the internship program.

Voluntary Participation

Participation in the IDX Exchange Internship Program is voluntary. IDX Exchange reserves the right to remove participants from the internship program if these professional expectations are not met.

Academic Integration

This program is designed to provide practical experience related to data analytics, statistics, business intelligence, and information science. Participants may use this experience to support academic internship requirements where applicable. Participants are encouraged to explore whether their academic institution offers credit for internship or experiential learning programs. Where a participant's school permits academic credit for this type of program, IDX Exchange is happy to complete any required institutional paperwork, provide supervision documentation, or communicate with faculty advisors as needed to support the academic credit process.

Future Opportunities

While this program is focused on skill development, IDX Exchange values the contributions of program participants. Completion of the program does not guarantee future employment or compensation, but exceptional participants may be considered for future opportunities as they arise. Participants understand there is no expectation of employment at the conclusion of the program.

Acceptance

To accept this offer, please sign below and return this letter. We look forward to supporting your professional development through the IDX Exchange Internship Program.

Sincerely,

Aidan Nguyen

Founder, IDX Exchange

Acceptance of Offer

I agree to participate under the terms described above.

Sruti Dondapati
